allied telecom

Internet Solutions

Unfettered by the limits of one access solution provider, Allied's "carrier agnostic," high-speed Internet and backup Internet capabilities enable your business to experience the most nimble, scalable and flexible solutions in the marketplace.

KEY FEATURES:

Broad range of access speeds, scalable as you grow

Pre-configured customer premise equipment, installed and managed by Allied

Around-the-clock proactive monitoring and support

Border Gateway Protocol (BGP) support for managing multiple connections

Full Internet Protocol Version 6 (IPv6) capabilities

SOLVING the Last Mile, First

Allied brings the core network connectivity right to your office suite.

DEDICATED INTERNET ACCESS (DIA)
Speed: 1 Mbps – 10 Gbps

Our most popular and cost effective service, Dedicated Internet Access provides a standard Ethernet connection with the security, rapid scalability and dedicated engineering resources required to meet the needs of businesses large, medium and small.

Variety of Fiber- and Copper-based Transport Options and Fixed Wireless

ALWAYS ON INTERNET (AOI)
Speed: 1 Mbps – 40 Mbps

Cost effective redundancy solution for businesses that cannot operate with a loss of Internet connectivity. Allied's back-up connection provides true path and network diversity and the peace of mind that goes along with it.

- Path and Hub diversity for network stability
- BGP protection between disparate networks
- Automatic failover
- Designed, tested, and fully managed by Allied
- Larger bandwidth connections possible in many locations
