

For companies who wish to utilize their own PRI capable PBX equipment but want a cost-effective VoIP solution, Allied provides **IP-based PRI Connectivity** for voice and data traffic over an Allied-provided private internet connection or existing network connectivity\*.

## MEETING Your Needs, Your Way

Allied can deliver IP PRI Service as a stand-alone solution or as part of a dynamic voice and data solution, utilizing a Dedicated Internet Access (DIA) connection to Allied's highly secure backbone network.

### ADVANCED FEATURES:

- Call Waiting
- Caller ID Delivery
- Caller ID Delivery Blocking
- Calling Name Delivery
- Calling Number Delivery
- Intercept User
- Intercept Group
- Call Forward Trunk Group
- Emergency Routing (for redundancy)

#### INHERENT CALLER LINE ID

- Allows intelligent routing of inbound callers to the appropriate destination
- Provides pre-identification of the calling party before answering
- Particularly useful for call center and advanced agent answering

#### DYNAMIC TRUNK ALLOCATION

- Dynamically allocates trunks in response to changing traffic patterns
- Provides more efficient overall trunk utilization

*\*In a Bring Your Own Bandwidth solution (BYOB), Allied cannot control Quality of Service (QoS).*

#### HIGH SPEED DELIVERY

- Delivered over high speed digital facilities leveraging Metro Ethernet transport
- Enables fast call setup
- Provides fast signaling connection to the PSTN (Public Switched Telephone Network)
