

allCloud™ Collaborate

For geographically-dispersed teams and employees who need the flexibility to work both in and out of the office, **AllCloud™ Collaborate** provides premium voice service and Unified Communications features to collaborate from anywhere.

The Allied On-Net ADVANTAGE

By design, your Allied Telecom voice service is not carried over the public Internet. Rather, your voice packets remain on Allied's highly secure and redundant private network for the ultimate in reliability and Quality of Service (QoS).
